Corporate Solutions

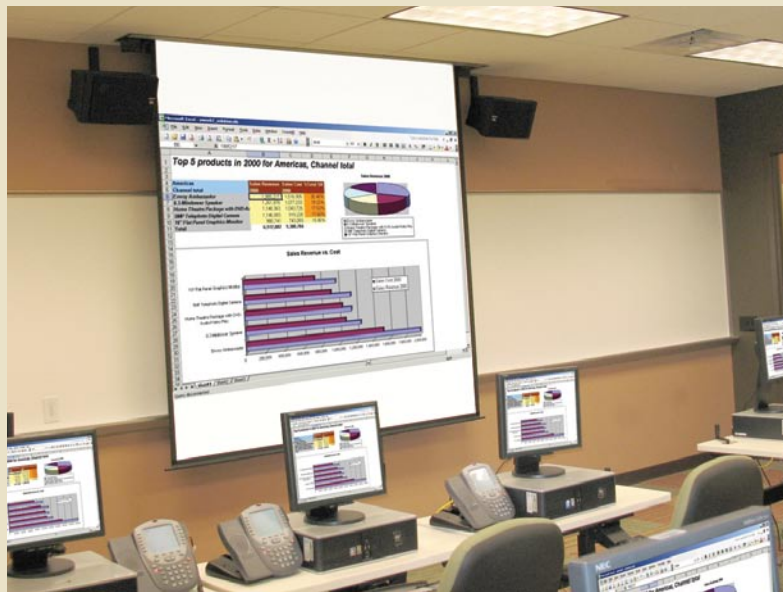

board rooms
call centers
conference rooms
municipalities
training rooms

When it comes to the corporate environment, the solution must support the culture of the organization. To make this happen, CEI listens to our client and their designer or architect to gain an understanding of the atmosphere needed for each particular environment. Our sales and engineering team then designs a solution based on the client's criteria learned in the discovery phase of the project. Ease of use, system maintenance and budgets are just some of the challenges we address in designing a solution that allows your staff to become more efficient and effective in their roles.

Our installation and service network allow us to support your business locally, regionally or nationally.

Training Environments need to provide the presenter and the attendees with the right AV tools to make the experience productive. From large to small environments, from single use to multiple use rooms, from stationary to roving trainers, CEI can design the right solution to enhance the effectiveness of the presentation. CEI listens to the client to understand how the room will be used and designs an AV solution that is simple to control.

"I am extremely picky with who does work for me. I searched twenty or so sound contractors and found CEI to be the most knowledgeable and timely."

David Palombo
Cherokee County Arts Council

CEI Corporate Solutions Include:

- System Design and Consultation
- Speech and Sound
- Interactive Whiteboards
- Live Audio and Video Streaming of meetings and events
- Control systems that are easy to use
- Plasma and LCD screens
- Video Conferencing
- Digital Recording Devices to capture the meeting for archiving or transcription
- Surveillance
- Lighting Controls
- Custom Furniture

Interactive Whiteboards

greatly improve productivity, eliminate errors, and reduce the need for expensive and

time consuming travel. This system solution allows for interactive communication between multiple users in various locations. Simply open a file such as a PDF, Excel, Word, photo or other document, annotate the file, and save all by a simple touch of a pen to the board. The solution includes a flat panel display with overlay, special marking pens and conferencing software that allows multiple users to be connected via the internet. This system provides a high tech yet simple solution for multiple business needs.

"Your design, budgeting and installation are all fabulous services. I always know what to expect and when to expect it. I want to commend you on the attitude of all of your people towards the project and their interest to ensure that everything is completed properly."

Ben M. Carter
Chairman
Ben Carter Properties, LLC

Digital Signage is a growing communication solution used to convey internal corporate messages ranging from sales performance, upcoming events, birthdays, meetings, special guests and

more. There are a variety of solutions that depend on the content the client would like to display. CEI can design and implement a solution as well as train your staff on how to use the system.

"Working with CEI was a very positive experience. They did exactly what they said they would with expediency and professionalism. Our digital signage system looks great and delivers the messages we want to our clientele."

Chuck Kneeland
Vice President
Restaurant Works Incorporated

GRTA
Georgia Regional Transportation Authority
Atlanta, Georgia

Board Room and Web Conference System: projector, automatic screen, retractable ceiling mounted 50" LCD flat screen, video conferencing cameras, 20 individual 20" LCD screens mounted in the tables, individual microphones, Crestron touch controls, and DVR system.

"Facing the awesome challenge of designing a new Boardroom, I had the wonderful fortune to select CEI as my vendor. Doing business with CEI was an absolute pleasure. I was a demanding customer, but the staff was very knowledgeable and attentive. Throughout the design and installation process CEI worked hand-in-hand with our builders, design team and most importantly me. Not only was the job completed on time and on budget but the CEI staff remained onsite the night before until the wee hours of the morning and was onsite when the entire boardroom went live for its first time use. I was very pleased with my new partner!"

The CEI staff is by far the most professional service personnel team I have ever encountered. It is rare to find a company that delivers stellar service as well as CEI. It is without question that I would recommend CEI for any audio visual system or innovative technical installation."

Deborah Johannes
Facilities Manager
GRTA

The CEI Advantage

The CEI Process

Communication

We listen to your needs and budget to define the best solution for your environment.

Engineering

We design the most advanced and reliable audio/visual solution for your environment.

Implementation

We build and integrate your system to provide ease of use and optimal service for years of satisfaction.

Service After the Sale

CEI designs and builds the most advanced and reliable audio/visual environments. Through active dialog with each client, our Sales and Engineering staff work together to design the ideal AV solution. Recognizing that our solutions may be used by a variety of people, we strive to ensure ease of use and optimal performance by selecting the appropriate equipment that will deliver years of satisfaction.

We believe that service and maintenance after the sale is something that differentiates us from others and with our national network, we are able to provide extraordinary service throughout the U.S.A. We see this as a way to strengthen our relationship with each and every client.
