Atmosphere, Theme, Brand

These elements captivate your customers and differentiate your business from others. If not managed properly, these elements can contribute to an uneventful customer experience or even prevent a return visit to your establishment. From the exciting sporting event on the big screen to the music that sets the mood, CEI designs, installs and maintains audio/visual systems that accentuate the atmosphere while reinforcing the brand and theme of your establishment.

Be it audio, video, phone or data, CEI seeks to understand your business and its objectives before the first component of your system is specified. At CEI, we first listen and understand before designing the best solution to fit the client's needs and budget. Our installation and service network allow us to support your establishments locally, regionally and nationally.

CEI Hospitality Solutions include:

- System Design and Consultation
- Background Music
- Custom Music Programming
- Flat Panel and Projection systems
- Lighting Controls
- Surveillance
- Low Voltage Wiring
- Control Systems that are easy to use
- Video and Web Conferencing
- Digital Signage
- Live Performance Systems

Hotels Beautiful sight and sound in common areas reminds hotel guests why they chose your property. Beyond the guest amenities, the state of the art conferencing technologies set your board and ball rooms apart from others offering the latest in presentation expertise. It is your property that allows your business travelers to feel comfortable as well as assured that the technology they need to convey their message is at their disposal.

CEI delivers sight and sound. CEI understands technology and integrates solutions to meet the client's needs and beyond.

Ted's Montana Grill
59 Restaurants

Solution: CEI worked with client and architect in the design stage to produce conduit, power and low voltage infrastructure drawings for all stores. Restaurant background music system, LCD flat screens satellite TV systems, telephone system, POS cabling and terminations. CEI has managed the installations for stores throughout the country. CEI provides continuing service and maintenance for all stores.

"When I think back 6 years ago to what has gone well at Ted's Montana Grill, CEI certainly comes to mind. The professionals and the support we receive is second to none. CEI has grown with our company and helped us to continue to grow and prosper. Thank you to the entire team at CEI."

George McKerrow Jr.
President and CEO
Ted's Montana Grill

Family Entertainment Centers CEI can provide solutions for a wide variety of venues and attractions, including theme parks, indoor/outdoor putt and play, zoos, aquariums, theaters, restaurants, and retailers. To augment all of the fun the guests will be having inside, technologies such as audio/video, surveillance cameras, and paging systems allow guests to know that any situations outside of the norm are being monitored and can be reported at a moments notice.

CEI worked with Sporting News Magazine and Holiday Inn International in developing the original design concept and branding to produce conduit, power and low voltage infrastructure drawings for all stores. Sporting News Magazine looked to create a dual purpose facility in Holiday Inns which serves continental breakfast facility in the morning and converts to a sports bar facility for lunch and dinner. CEI provided a background music system, LCD flat screens satellite TV systems on CEI designed custom display stands, telephone system, POS cabling and terminations. CEI continues to provide engineering design, installation, service and maintenance for future stores throughout the country.

Sports fans know what to expect in a great Sports Bar. Of course the latest in high definition video with superior audio quality is on everyone's list. There must be a variety of events to watch, all of which must be able to be heard and seen clearly. Many Sport Bars offer a dance floor or DJ booth for the post event celebration. CEI understands the needs and wants of sports bar owners. Our extensive relationships with companies like Champps Americana, Big River Brewery and The Sporting News Grill have allowed CEI to gather vast experience in designing, implementing and supporting this type of facility.

"Over the years Champps Restaurants have been able to successfully deliver the highest quality A/V to our customers at over 50 locations in 22 states and a great deal of that success is due to our relationship with and support from the CEI Team."

David Miller
Vice President of Construction
and Development
Champps Americana

The CEI Advantage

The CEI Process

Communication

We listen to your needs and budget to define the best solution for your environment.

Engineering

We design the most advanced and reliable audio/visual solution for your environment.

Implementation

We build and integrate your system to provide ease of use and optimal service for years of satisfaction.

Service After the Sale

CEI designs and builds the most advanced and reliable audio/visual environments. Through active dialog with each client, our Sales and Engineering staff work together to design the ideal AV solution. Recognizing that our solutions may be used by a variety of people, we strive to ensure ease of use and optimal performance by selecting the appropriate equipment that will deliver years of satisfaction.

We believe that service and maintenance after the sale is something that differentiates us from others and with our national network, we are able to provide extraordinary service throughout the U.S.A. We see this as a way to strengthen our relationship with each and every client.
